

# Instruction Manual

## LORUS WORLD TIME WATCH

- ◆ Make sure that the watch is correctly set to the current time.
- 1. Among the city names printed on the rotating indicator ring, find the city name representing the time zone which you are in.

**[EXAMPLE]**  
**TOKYO, 9:00AM**  
 Find the city name **TOKYO** on the rotating indicator ring.

**Rotating indicator ring**

- 2. Turn the Bezel until the city name becomes aligned with the number representing the current hour of the inner 24-hour indicator.

Rotate the Bezel to align **TOKYO** with the number "9" of the inner 24-hour indicator.

**24-hour indicator**

- 3. The other numbers of the 24-hour indicator respectively show the current hour in the city with which it is aligned.

Check the number of the 24-hour indicator with which each city name is aligned.

**CHICAGO**, aligned with "18", is 6:00 PM.

**DUBAI**, aligned with "4", is 4:00 AM.

Repeat the above procedures every time you check the current times of the other cities.

## Comparison table of standard times

GMT ± hours	Names of the cities		other cities
0	GMT	Greenwich Mean Time	London Casablanca Dakar
+ 1	PARIS(PAR)	Paris	Rome Amsterdam Tripoli Frankfurt Berlin
